## Setting up the keyboard case

Getting started

1 Pull the battery tab away from the keyboard:

2 Open the keyboard case, make sure the edge of your iPad is aligned with the tablet holder and push down:

**3** Move the keyboard case into the typing position:

The keyboard turns on automatically.

Establishing connection with your iPad

The keyboard case links to your iPad via a Bluetooth connection. The first time you use the keyboard case, you must pair it with your iPad.

The status light blinks blue to indicate that the keyboard is discoverable, ready for pairing with your iPad.

The first time you turn on the keyboard it remains discoverable for 15 minutes.

If the status light turns red, replace the batteries. For more information, see "Replacing the keyboard batteries."

To pair your keyboard case with your iPad:

1 On your iPad:
   – Make sure Bluetooth is on. Select Settings > Bluetooth > On.
   – Select "Slim Folio" from the Devices menu.

2 If your iPad requests a PIN, enter it using the keyboard (not on your iPad).

   When successful connection is made, the status light turns solid blue for a short time, and then turns off.

   When successful connection is made, the status light turns solid blue for a short time, and then turns off.

Using the keyboard case

Two viewing positions

The keyboard case provides two viewing positions—one for typing and another for browsing.

To type, move the keyboard case into the typing position, aligning it with the built-in magnet to secure it:

The keyboard turns on automatically when you move the keyboard case into the typing positon.
To browse, place the keyboard case in the browsing position:

The keyboard powers off automatically when you move the keyboard case out of the typing position.

Detaching your iPad

To detach your iPad from the case, bend back one of the tablet holder corners:
Your iPad is then released:

Storing your iPad for travel

1 Insert your iPad in the tablet holder.
2 Close the keyboard case:
