Your G502 is ready to play games.  
If you would like to customize your G502,  
refer to the next section.

You can customize the three onboard profiles of the G502— button programming, lighting color, lighting effects, and tracking behavior—using the Logitech Gaming Software. Download this free software and learn how to customize the G502 at [www.logitechG.com/support/g502-hero](http://www.logitechG.com/support/g502-hero)

4

To adjust the weight and balance of your G502, first open the weight door by grasping the mouse firmly in your right hand and pulling the tab down with your left thumb.

5

You can place up to five 3.6 gram weights in a number of different orientations. Experiment with different positions for the weights to find an overall weight and balance that feels right for you.

6

After inserting the weights, close the weight door by inserting the tabs on the weight door into the slots on the left side of the mouse and rotating the door down until the magnet holds the weight door firmly closed.

## Onboard profiles

The G502 has three preconfigured profiles, one each for high sensitivity gaming, low sensitivity gaming, and standard mouse usage. Use Button 9 (see mouse drawing) to rotate through these default profiles. When you change profiles, the DPI indicator lights will change color to blue for three seconds and will indicate the new mode as shown here:

**Prof. 1**

**Prof. 2**

**Prof. 3**

## DPI indicators

DPI values are shown using the three LEDs indicated in the mouse drawing. The image below shows which DPI value is being indicated by the LED panel.

**DPI 1**

**DPI 2**

**DPI 3**

**DPI 4**

**DPI 5**

## Hyperfast Scroll Wheel

The G502 features Logitech's exclusive dual-mode hyperfast scroll wheel. Click the button right below the wheel (Button G12) to switch between the two modes.

### Tips

Weight and balance tuning is very much an exercise in personal preference.

Generally speaking, more weight makes it easier to control high DPI settings, while less weight makes low-DPI gaming less fatiguing.

Centering weights along an imaginary line between your thumb and right-side grip finger(s) will help maintain optimal front-to-back balance.

The effects of changing weights may not be immediately apparent. After changing the position or number of weights, give yourself some time to experience the difference before changing them again.

Try the default profile settings in practice games before changing these settings.

Advanced gamers can customize each game according to their specific button configuration and sensitivity switching needs. The Logitech Gaming Software stores this information and applies it automatically when the game is detected.

## **If the mouse doesn't work**

- Unplug and re-plug the USB cable to ensure a good connection.
- Try the mouse USB cable in another USB port on the computer.
- Use only a powered USB port.
- Try rebooting the computer.
- If possible, test the mouse on another computer.
- Visit [www.logitechG.com/support/g502-hero](http://www.logitechG.com/support/g502-hero) for more suggestions and assistance.

4

如要调节 G502 的重量与平衡，请右手握住鼠标，用左手大拇指向下拉动凸舌，打开调重槽外盖。

5

您可以沿不同方向放置最多 5 个 3.6 克配重块。  
尝试将配重块放于不同位置，找到适合自己的重量和平衡。

6

放好配重块后，将外盖上的卡舌插入鼠标左侧插槽中，然后向下旋转直至外盖被磁力牢固闭合。

## 内置配置设定

G502 拥有三个预设的配置设定，分别用于高灵敏度游戏、低灵敏度游戏和标准鼠标应用。使用按钮 9（见鼠标示意图）可在这些默认配置文件间循环切换。当您更改配置设定时，DPI 指示灯将变为蓝灯，并持续 3 秒，以如下方式指示新模式：

## DPI 指示灯

DPI 值将通过鼠标示意图中标明的 3 个 LED 指示灯表示。下图显示 LED 面板中指示的当前 DPI 值。

## 疾速滚轮

G502 采用罗技双模式疾速滚轮 点击位于滚轮下方的按钮（按钮 G12）可在两种模式间切换。

### 提示

重量与平衡调节属于个人喜好设置。一般来说，鼠标越重越易控制高 DPI 设置，但对于低 DPI 游戏而言，越轻则越易于降低玩家的疲劳感。

将配重块放在您大拇指与右侧握槽手指之间虚线的中心点，将有助于保持前后平衡。

重量调节效果不会立即显现。改变配重块位置或重量后，请先行体验再确定是否需要继续做出改变。

在更改默认设置之前，请先在练习游戏中尝试使用默认配置设定。

高级玩家可根据其特定的按钮配置和灵敏度切换需求来自定义每个游戏。罗技游戏软件会储存这些信息，并在检测到游戏时自动应用。

## 若鼠标无法正常工作

- 请拔出并重新插入 USB 连接线，以保证连接状态良好。
- 尝试将鼠标 USB 连接线插入电脑的其他 USB 端口。
- 请仅使用供电型 USB 端口。
- 尝试重新启动电脑。
- 如果可能，在另一台电脑上测试鼠标。
